# TURNKEY GROUND STATION

The Expedite Turnkey ground station presents an encompassing solution that integrates the Expedite modem with a curated array of antennas.

This comprehensive package simplifies the setup procedure, offering satellite operators a seamless and integrated resolution.

Can be operated remotely through Expedite's interfaces, including:

TCP/IP

REST API

## COMPONENTS

### Expedite Transceiver

An advanced transceiver optimized for satellite ground operations, excelling in burst-mode communications. The modem integrates with ground networks and supports various rotor solutions.

### Indoor Electronic Enclosure

A diverse array of components, encompassing power suppliers, high-power amplifiers, a sequencer & various essential elements.

### Antennas

Provided in a range of configurations, including UHF, VHF, and S/L-bands. It comes equipped with an indoor power supply and rotor control, complemented by an outdoor rotor for enhanced functionality
